The Renewable Energy Exhibition goes annual.

It will now take place in Paris and Lyon alternately.

4th edition in Paris, France
15-17 June 2006

Enhancing energy efficiency...

The whole world is realising that, when it comes to energy consumption, less is better.

From the Kyoto Protocol to European targets: 21% of electricity must come from renewable sources by 2010.

The increasing price of oil and fossil fuels is an additional boost for a flourishing market.

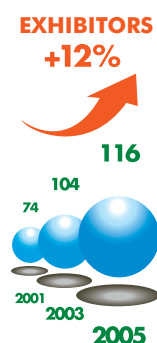

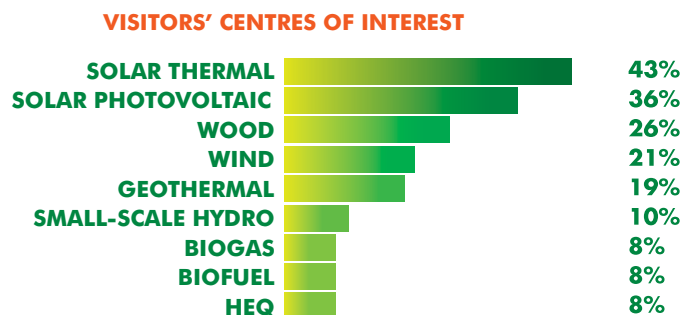

In just 3 editions, this lively professional exhibition has become the forum for finding out about applications from all fields of renewable energy.

... at the only show of its kind in France.

5th edition in Lyon, France
14-17 February 2007

Lyon edition - 2005 round-up:

- **17 500 professional visitors** including **26% managers** and **20% engineers and technicians**, and **3380 individuals** with their own projects during the public opening days.
- **116 exhibitors**: interest is growing with **75% of exhibitors from outside France**.
- **600 participants in the European conferences** organised during the exhibition.

Paris edition - 15-17 June 2006

**Held in Paris for the first time,
the Renewable Energy Exhibition will be
geared to professionals and open to the general public.**

The market is booming and inventions are flourishing...

Users, specifiers and fitters are eager to find out more.
The economic and political context is changing, notably with the rising buyback price of photovoltaic energy.

New: the Renewable Energy Exhibition is expanding.

It now includes energy management in the building trade and biofuel for transport.

With you, more than 100 exhibitors will be attending:

Equipment and material manufacturers	Thermal solar
Component manufacturers	Photovoltaic solar
Interior designers	Wind
Design offices	Biomass
Specialist distributors/fitters	Biofuels
Promotional agencies	Hydropower
Energy operators	Geothermal
	Energy management
	Insulation

Over 25 000 visitors are expected:

• **Professional visitors:**

- Fitters, HVAC companies,
- Specifiers (architects, technical design offices, building economists),
- Public project managers (local and regional authorities, social housing agencies, hospitals),
- Private project managers (investors, developers, industrialists, house building companies, promoters, hoteliers),
- Electricity producers and distributors,
- Dealers, distributors.

• **Open to the public on 16 (afternoon) and 17 June:**

Members of the public will be able to meet the professionals face-to-face and find concrete, tried-and-tested renewable energy solutions for their homes.

Thursday 15 June

Annual conference of the Syndicat des Energies Renouvelables.

This major event, a "must" for the entire trade, will involve some 1 000 major decision-makers and stakeholders.

Energy to succeed

Paris exhibition
15 to 17 June 2006
09.00-18.30 Thurs. to Sat.

Lyon exhibition
14 to 17 February 2007

Get a head start.

Book your stand now.

The Renewable Energy Exhibition team is on hand to advise and assist:
